

The most comprehensive workshop on venous disease:

2nd Hands-on Workshop on Venous Disease, Timisoara 17 October 2013

The 12th Romanian Congress of Phlebology in Timisoara-Romania gives you a unique comprehensive program focused on Hands-on learning, a review of the latest updates and “state of the art” management of venous disease, an opportunity to share in discussion and actively engage with the Faculty and industrial partners in a relaxed surrounding.

Preliminary program

Alina Fratila: Endovenous ablation VENEFIT technique

Athanasios Giannoukas:

1. Endovenous ablation of Varicose veins: What are the important prerequisites?
2. Laser and Radio-frequency ablation of varicose veins: how do they work?
3. Current management of superficial vein thrombosis

Felizitas Pannier : Performance and results of EVLA

Eberhard Rabe: European Guidelines of Sclerotherapy.

Lorenzo Tessari :

1. Mini-Invasive Treatment of Pelvic Escape Points
2. live demonstration : Venous Mapping and Therapeutical Indications adressed to Sclerofoam”

Tomasz Urbanek : The invasive treatment of Deep Vein Thrombosis

The 2nd Hands-on will train you in methods to diagnose and treat acute and chronic venous disease such as duplex investigation, saphenous ablation techniques such as RF, laser, steam and foam sclerotherapy, endovenous thrombectomy and compressive therapy. The workshop is open to all specialty physicians, including physicians in training, wanting to learn the latest in venous management.

Delegates are limited to 20 “first come, first served”
