1. Doctoral Networks – A few definitions

Important Note:

All main definitions (not included in this guide) are available in the [MSCA part of the Work Programme](#). Links to other official documents (e.g. [Horizon Europe General Annexes of the Work Programme](#), [Horizon Europe Unit Model Grant Agreement](#), [Horizon Europe Programme Guide](#)) are provided in the [call page on the Funding and Tenders Portal](#).

Structure of Doctoral Networks:

All Doctoral Networks have the objective of promoting international, inter-sectoral and multi/inter-disciplinary collaboration in doctoral-level training in Europe. They also have the objective of training highly-skilled doctoral candidates and stimulating entrepreneurship, creativity and innovation in Europe and beyond. There are three different modalities:

1. Regular Doctoral Networks (DN): Doctoral Networks aim to meet the objectives mentioned above by enrolling candidates in a doctoral programme and a joint research project.

2. Industrial Doctorates (DN-ID): Industrial Doctorates aim to meet the objectives of DN but go further by requiring the mandatory involvement of the non-academic sector in the doctoral training so that the skills acquired better match public and private sector needs.

3. Joint Doctorates (DN-JD): Joint Doctorates also aim to meet the objectives of DN but go further by proposing the creation of joint doctoral programmes, leading to the delivery of joint, double or multiple doctoral degrees recognised in at least two EU Member States (MS) or Horizon Europe Associated Countries (AC).

The overall EU contribution per Grant Agreement is limited to a maximum of:

- 360 person-months per network for regular DNs (e.g. 10 Doctoral candidates for 36 months each)
- 540 person-months per network for DN-IDs and DN-JDs (e.g. 15 Doctoral candidates for 36 months each)

Failure to respect these limits will result in the proposal being declared ineligible.

Note that the expert evaluators will carefully consider the requested number of person-months with respect to the coherence of the proposal and the capacities of the hosts.

Joint/double/multiple doctoral degree: A joint degree refers to a single diploma issued by at least two higher education institutions offering an integrated programme and recognised officially in the countries where the degree-awarding institutions are located. A double or multiple degree refers to two or more separate national diplomas issued by two or more higher education institutions and recognised officially in the countries where the degree-awarding institutions are located. The final joint, double, or multiple degree must be awarded by institutions from at least two different MS and/or AC countries. Each Researcher must be enrolled in a doctoral programme leading to the award of a doctoral degree in at least one EU Member State or Horizon Europe Associated Country, and for Joint Doctorates in at least two.

Supported researchers must be doctoral candidates, i.e. not already in possession of a doctoral degree at the date of the recruitment.

Researchers who have successfully defended their doctoral thesis but who have not yet formally been awarded the doctoral degree will not be considered eligible.

Date of Recruitment means the first day of the employment of the researcher for the purposes of the action (i.e. the starting date indicated in the employment contract or equivalent direct contract).

Mobility Rule: researchers must not have resided or carried out their main activity (work, studies, etc.) in the country of the recruiting beneficiary for more than 12 months in the 36 months immediately before their date of recruitment. Compulsory national service, short stays such as holidays, and time spent as part of a procedure for obtaining refugee status under the Geneva Convention¹ are not taken into account. For international European research organisations², international organisations, or entities created under Union law, recruited researchers must not have spent more than 12 months in the 36 months immediately before their date of recruitment in the same appointing organisation.

Note that the mobility rule applies to the (first) beneficiary where the researcher is recruited. In case of multiple recruitments, the mobility rule only applies to the first recruitment.

40% rule: in the context of the consortium's composition, applicants should take into account that for all DNs, no more than 40.0% of the total EU financial contribution may be allocated to beneficiaries in the same country or to any one International European Research Organisation or International Organisation. This concerns the total amount of the budget allocated to a country/international organisation and not the number of person-months. Proposals not complying with this condition will be considered ineligible. The 40.0% is determined at proposal submission stage on the basis of the maximum grant amount (beneficiaries will not be penalised for the non-execution of person-months by other beneficiaries during the project implementation).

Resubmission restrictions: please note that, according to the Work Programme, applicants having received a score below 80% in the DN 2021 call are not eligible to resubmit a similar proposal in the DN 2022 call. As specified in the submission forms Part A, a 'similar' proposal or contract is one that differs from the current one in minor ways, and in which some of the present consortium members are involved.

Gender Equality Plan: Having a gender equality plan is an eligibility criterion for Public bodies, Higher education establishments and Research organisations from Member States and Associated Countries. Be aware that if the proposal is selected, having a Gender Equality Plan will be necessary before the grant agreement signature (applicable on calls with deadlines in 2022 and beyond). Please refer to the [Horizon Europe guidance on gender equality plans](#).

National Contact Points (NCPs) have been set up across Europe and beyond by the national governments to provide information and personalised support to Horizon Europe applicants in their native language. The mission of the NCPs is to raise awareness, inform and advise on Horizon Europe funding opportunities as well as to

¹ 1951 Refugee Convention and the 1967 Protocol.

² 'International European research organisation' means an international organisation, the majority of whose members are MS or AC, whose principal objective is to promote scientific and technological cooperation in Europe.

support potential applicants in the preparation, submission and follow-up of the grant applications. For details on the NCP in your country, please consult the National Contact Points page.

2. Doctoral Networks in a nutshell

Minimum Number of Participating Organisations			
Role in the network	DN	DN-ID*	DN-JD
Beneficiary	3 ³	3 ³	3 ³ doctoral degree-awarding ⁴
Associated Partner ⁵	No minimum	No minimum	No minimum

*Please note that Doctoral candidates in DN-ID must spend at least 50% of their time in the non-academic sector, which requires the presence of non-academic entities as beneficiaries or associated partners.

Summary of Tasks				
Role in the network	Recruitment of Researchers	Training and/or Hosting of Seconded Researchers	Participation in Supervisory Board	Directly Claims unit contributions
Beneficiary	✓	✓	✓	✓
Associated Partner	✗	✓	✓	✗

Minimum Country Participation in a DN	
Implementation Mode	Country of beneficiaries
Regular Doctoral Networks (DN)	

³ Applications must be submitted by a consortium including at least three independent legal entities, each established in a different EU Member State or Horizon Europe Associated Country and with at least one of them established in an EU Member State. Should none of them be entitled to award a doctoral degree, a university or a consortium/grouping of academic/research institutions entitled to award a doctoral degree must be added to the project as an associated partner or an associated partner linked to a beneficiary.

⁴ An applicant from the academic sector, which has transferred the right of awarding a doctoral degree to a consortium/grouping of academic/research institutions to which it belongs to, is also eligible.

⁵ It is recommended that the number of associated partners is reasonable and commensurate with the size of the network.

Industrial Doctorates (DN-ID)	Minimum: 3 different countries EU MS or AC with at least one of them established in an EU MS.
Joint Doctorates(DN-JD)	
<p>Additional beneficiaries can be established in EU MS, AC or low- and middle-income non-associated countries included in the list of countries eligible for funding provided in the Horizon Europe Programme Guide. Legal entities established in countries not listed in the Programme Guide will be eligible for funding if their participation is considered essential for implementing the action by the granting authority.</p> <p>Associated Partners can be established anywhere in the world and from any sectors.</p>	

Overview

		DN	DN-ID	DN-JD
BENEFICIARY (IES)	Minimum Number of beneficiaries	3	3	3
	Minimum MS or AC	3	3	3
	Minimum MS (beneficiaries)	1	1	1
	Academic sector	No restrictions	No restrictions	Minimum 3 entitled to award doctoral degrees; at least 2 (beneficiaries/ associated partners/ associated partners linked to a beneficiary) conferring the degree established in MS/AC.
	Non-academic sector	No restrictions	No restrictions	No restrictions
	Max no. of person months	360	540	540
	Max 40.0% budget for 1 country/international organisation	Mandatory	Mandatory	Mandatory
Beneficiary or associated partner/associated partner linked to a beneficiary awarding PhD	Mandatory (beneficiary or associated partner/ associated partner linked to a beneficiary)	Mandatory (beneficiary or associated partner/ associated partner linked to a beneficiary)	Mandatory for minimum 3 entities (beneficiary or associated partner/ associated partner linked to a beneficiary), of which 2 in MS/AC	
Joint/double/multiple award of PhD	Optional	Optional	Mandatory	
Joint/double/multiple degree – letter of pre-agreement	N/A	N/A	Mandatory	
Joint supervision for researchers	Encouraged	Mandatory (from the 2 sectors)	Mandatory	

Researchers enrolment in the PhD	Mandatory	Mandatory	Mandatory
Stay in non-academic sector	Encouraged	Min. 50% of fellowship duration	Encouraged
Secondments	≤ 1/3	No limitation	No limitation
Associated partner: Letter of Commitment	Mandatory		
Ranking lists	8 (Scientific) panels		
Budget	~€427 Million		

3. Recruitment and Eligibility of Researchers

3.1 Recruitment

All Doctoral Networks (DN, DN-ID, DN-JD)

- Every beneficiary must recruit, host at their premises and supervise at least 1 researcher;⁶
- Researchers are recruited for minimum 3 and maximum 36 months. They must be enrolled in a doctoral programme and should work full-time on the project.

Industrial Doctorates (DN-ID)

For DN-ID, the active participation of the non-academic sector is of paramount importance. Recruited researchers must spend at least 1/2 of their fellowship duration in the non-academic sector. The maximum secondment duration of up to 1/3 of the researchers' actual recruitment period (i.e. up to 12 months in the case of a 36-month recruitment) does not apply to DN-ID. For DN-ID, it is therefore possible to have doctoral candidates recruited in the academic sector for 100% of their time, and sent on secondments to non-academic participants for at least 50% of the time. Equally, it is also possible to have doctoral candidates recruited in the non-academic sector for 100% of their time, and sent on secondments to academic participants for up to 50% of the time. Please note that all beneficiaries must still recruit at least 1 doctoral candidate. Non-academic participants that host secondments but do not recruit can only be associated partners. It is also possible to propose multiple recruitments, whereby a doctoral candidate is recruited for 50% or less of their fellowship duration by a beneficiary in the academic sector, and recruited for 50% or more of their fellowship duration by a non-academic beneficiary. Any combination of these two options is also possible, as long it complies with all DN-ID requirements.

Please note that the non-academic partner in an Industrial Doctorate (ID) is not necessarily an "Industrial" partner, but could also be any partner that satisfy the Work Programme definition of a non-academic sector (including non-exhaustively e.g. an NGO, a charity organisation, a hospital)

Joint Doctorates (DN-JD)

For DN-JD, each recruited researcher must be enrolled in a joint, double or multiple degree awarded by at least two participating organisations from a MS/AC. The maximum total secondment duration of up to 1/3 of the researchers' actual recruitment period does not apply to DN-JD.

Important Note: The location of the premises of the recruiting beneficiary will have an influence on the fellow's salary in view of the different country correction

⁶ Beneficiaries can use Associated partners linked to them to host and supervise researchers. Note, however, that only beneficiaries can recruit researchers.

coefficients⁷ (see Table 1 of the [MSCA Work Programme part 2021-2022](#)). It may also affect the eligibility of the proposal (see 40.0% rule and mandatory recruitment rule by each beneficiary above). Please see the relevant FAQs on the [call page](#) for examples.

Note that the mobility rule applies to the (first) beneficiary where the researcher is recruited.

The beneficiaries will be responsible for the selection and recruitment of the eligible researchers. An important aspect of the Commission's policy towards researchers is to improve their working and living conditions and to promote mobility in order to open up new perspectives for research careers within Europe. The Marie Skłodowska-Curie actions aim to act as a catalyst in this respect. The beneficiaries will therefore be required to meet certain conditions relating to the publishing of vacancies (e.g. on [Euraxess portal](#)), recruitment and length of appointment of researchers and which should be in line with the principles set out in [the European Charter for Researchers and Code of Conduct for the Recruitment of Researchers](#).

Note that a beneficiary may not recruit a researcher via an employment agency.

3.2 Eligible Researchers

All researchers recruited in a DN must be **doctoral candidates** (i.e. not already in possession of a doctoral degree at the date of the recruitment) and undertake transnational mobility (see the mobility rule definition in section 1). Researchers who have successfully defended their doctoral thesis but who have not yet formally been awarded the doctoral degree will not be considered eligible.

For all recruitments, the eligibility of the researcher will be determined at the date of their **first recruitment** in the action. This status will not evolve over the lifetime of the action, even if they are re-recruited at another beneficiary.

3.3 Secondments

Secondments of the researcher to other beneficiaries and associated partners/associated partners linked to other beneficiaries – from academic and/or non-academic sectors- are encouraged, but should be relevant, feasible and beneficial for the researchers, and in line with the project objectives. They are an integral part of the research proposal and must be described in the proposal. Any subsequent changes in the secondment plan during the project implementation must be pre-approved by the European Research Executive Agency (REA).

Normal practice during secondments is for the recruited researchers to keep their contract with the sending institution, which also pays their travel and subsistence expenses (e.g. accommodation, visa, residency card) from the institutional unit contributions. During their secondment, researchers receive supervision and training at the premises of the receiving beneficiary, its associated partner linked

⁷ Applicants are invited to consider that in DN-ID and JD fellows may have to spend long periods in different countries with different country coefficients. If not duly considered at proposal stage by choosing the most appropriate recruitment option (or the most appropriate recruiting beneficiary), this might have negative implications on the capacity of the fellows to afford the cost of living during their mandatory secondments.

to a beneficiary, or associated partner. The premises of these institutions must be independent from each other and therefore the secondment must involve physical mobility of the fellow, with specific supervision arrangements. Secondments should be differentiated from short visits, i.e. of a few days.

Secondments in DN of six months or less which require mobility from the place of residence **must** be financed using the Research, Training and Networking contribution in order to prevent an unreasonable financial burden for the recruited researchers. This includes at least the travel and accommodation costs. Longer secondments can also be supported in the same way.

While **virtual mobility** does not have the same multifaceted impact on the development of individuals and sustainable cooperation among organisations as physical mobility, it can however complement it, facilitate long-distance collaboration and be an effective means to faster achieving research and training objectives. In this regard, all MSCA proposals are encouraged to explore opportunities offered by e-infrastructures and related services, in particular those provided through [GEANT](#), the pan-European research and education network. These activities should be clearly described in the proposals, should be relevant, feasible and beneficial for the researchers, and in line with the project objectives.

In Regular DNs, each recruited researcher can be seconded to other beneficiaries and/or to associated partners/associated partners linked to other beneficiaries for **a duration of up to one third of his/her actual recruitment period**. Virtual mobility will not be considered as a regular secondment since it does not involve physical mobility. Therefore, it will not count towards the maximum duration of one third of the researcher's total recruitment period.

In DN-ID, all recruited researchers must spend at least 50% of their time in the non-academic sector. The specific percentage of time that each researcher will spend at each institution should therefore be **indicated in the proposal**. The maximum total secondment duration of up to 1/3 of the researcher's actual recruitment period does not apply to DN-ID.

It is expected that the recruited researchers will benefit from the strong research collaboration of the beneficiaries (academic and non-academic). The provision of additional training/secondment by associated partners is encouraged, where relevant.

In DN-JD it is expected that the recruited researchers will need to spend at least the minimum period of time required to be eligible to enrol in a doctoral degree and defend the doctoral thesis at the corresponding academic participating organisations. This will vary according to the institution and country in question. The maximum total secondment duration of up to 1/3 of the researcher's actual recruitment period does not apply to DN-JD.

4. Instructions for Completing Part A and Part B of the Proposal

The proposal contains two parts:

- Part A of the proposal is generated by the IT system. It is based on the information entered by the participants through the submission system in the Funding & Tenders Portal. The participants can update the information in the submission system at any time before final submission.
- Part B of the proposal is the narrative part that includes three sections that each correspond to an evaluation criterion. Part B can be downloaded from the [call page](#) on the [EU Funding & Tenders Portal](#) or from the [REA website](#).

All instructions for completing the part A and B of the proposal are embedded in the template that can be found on the [call page of the Funding and Tender Opportunities Portal](#) and should be removed before proposal submission. A clean version is also available at the end of the template.

The [Funding & Tenders Portal online manual](#), as well as the [Proposal Submission Service User Manual](#) gives detailed instructions on how to complete the Part A.

Please note that, in part A, associated partners do not need to fill in the information about the researchers involved, nor the role of participating organisation in the project. This information however will need to be described in the relevant sections of parts B1 and B2.

Please also note that, in part A, neither the beneficiaries, nor the associated partners, need to fill in the list of up to five publications, relevant previous projects, or significant infrastructure. This information however will need to be described in the relevant sections of part B2.

 Please note that the Number of Person Months in the budget table refers to the total number of person months for each beneficiary e.g. if there are 2 Doctoral Candidates recruited by beneficiary X for 36 months each, then the number of person months should be 72.

 Only one contact per organisation should make changes to the proposal at a time. Editing the form in 2 or more tabs/browsers in parallel will lead to data loss.

Specific guidance on how to select the most appropriate keywords, together with the list of MSCA keywords, can be found on [REA website](#).

Templates of the letter of commitment (for associated partners) and for the joint/double/multiple doctorate pre-agreement (for DN-JD) are available at the end of the proposal template.

Please note that associated partners linked to a beneficiary do not need to provide a letter of commitment. However, it should be clear from part B1 which associated partners are linked to a beneficiary, and which ones are not.

Scientific Misconduct and Research Integrity

Issues of scientific misconduct and research integrity are taken very seriously. In line with the Horizon Europe Rules for Participation, appropriate action such as termination of the Grant Agreement Preparation phase or, if the Grant Agreement has been signed, the implementation of liquidated damages and financial penalties, suspension of payments, recoveries and termination of the Grant Agreement, will be taken against any applicants/beneficiaries found to have misrepresented, fabricated or plagiarised any part of their proposal. The applicants will also be required to make a "Declaration on Honour" in Part A of the proposal.
