

# The Story as Sapiens' Vertical Spine – Narrative Medicine Seminars 2023 - III

Third edition: Autumn workshops

## The physician with the soul on the tip of the pen

We have become accustomed to being either on one side or the other of the stethoscope: **Doctor** or **Patient**.

But what happens when the doctor knows how to listen so carefully that a life story becomes a mirror through which thousands of faces can be reflected? What happens when the doctor makes his own ineffable coat the paper sheet of the soul?

Sounds familiar? *I've lived it! Yes, I remember, it happened to me too. I have a similar story.*

The special guest of the **C-CLASC** school of narrative medicine, **2023** autumn workshops is **Professor Göksel Altınişik Ergur**, physician and writer at Pamukkale Medical University.

We invite you to a transcultural dialogue about the concepts of illness and pain, about the ways in which we might **speak, write** and **read** pain.

### Week 1 – November 3<sup>rd</sup> - Before Reading to You

In dialogue with **Mrs. Professor Göksel Altınişik Ergur** about the purpose of being both a doctor and a writer.

Signing **AS OUR HEARTS KEEP BEATING** and **AMPRENTE PE SPAȚIUL GOL**

books that integrate the recollection and the understanding of the past, by the physician and the patient, for a successful therapeutic future.

#### Interactive course

" Introduction to narrative medicine - I", **Göksel Altınişik Ergur** and **Gabriela-Mariana Luca**, **6.30 p.m./** online

" When stories become healing", **Cosmina Lungoci**, **7.10 p.m.** / online
