

**Dr. Torsten Christ, MD, PhD, DrHab**  
(Hamburg, Germany)

Dr. Christ received his diploma in Medicine from the Humboldt-University of Berlin and his MD thesis from the Max-Delbrück-Center for Molecular Medicine of Berlin, with the title Morphometric analysis of Ultrastructure in rat myocardium under the condition of intermittent starvation. In 2010, he was presented with the Habilitation and Venia legendi in Pharmacology and Toxicology from the Dresden University of Technology of Germany (relation between Ca<sup>2+</sup>-current and contraction force).

Since 2012, he is a Group leader in the Department of Experimental Pharmacology and Toxicology from UKE.

Throughout his career, Dr. Christ has been a nucleus member of DGK working group in Cellular cardiac electrophysiology and ESC working group in Cellular cardiac electrophysiology and an editorial Board member for the Europace and Journal of Cardiovascular Pharmacology.
