Iulia Muntean

University Assistant, PhD

Professionally, I have a strong understanding of dental principles, processes and clinical practices. During my six years of university studies, I developed excellent organisational skills and empathy towards patients. Since June 2020, I have been practising dentistry in a private dental clinic, further strengthening my ability to prioritise and manage multiple tasks simultaneously. Personally, I am open-minded and enjoy encouraging and inspiring others to excel. I am detail-oriented, organised and receptive to new ideas and approaches. I possess excellent interpersonal, intercultural, verbal and written communication skills, as well as strong analytical and effective problem-solving abilities.

Professional Experience
